### **Produced Water Spill in Bottineau County**

BISMARCK, N.D. – A produced water spill occurred Wednesday, Aug. 10, as a result of a damaged injection line. The incident occurred in Bottineau County, approximately 3.5 miles north of Mohall. The line is operated by Enduro Operating, LLC.

Produced water is a waste product generated during oil production. Initial estimates indicate approximately 200 barrels were released onto a pasture. At this time, no surface water has been impacted. The NDDoH is responding on site and will work with the company on remediation plans.

For more information, contact Bill Suess, North Dakota Department of Health, at 701.328.5216.
